

## Department of Energy

Fermi Site Office  
Post Office Box 2000  
Batavia, Illinois 60510

February 15, 2017

Ms. Martha E. Michels  
Chief Safety Officer  
Fermilab  
P.O. Box 500  
Batavia, IL 60510

Dear Ms. Michels:

**SUBJECT:** NATIONAL ENVIRONMENTAL POLICY ACT DETERMINATION AT FERMI  
NATIONAL ACCELERATOR LABORATORY – 2017 FERMILAB SITE  
DEMOLITIONS

**Reference:** Letter, from M. Michels to R. Hersemann, dated February 14, 2017, Subject:  
National Environmental Policy Act Environmental Evaluation Notification Form for  
the 2017 Fermilab Site Demolitions

The Fermi Site Office (FSO) has reviewed the National Environmental Policy Act (NEPA) Environmental Evaluation Notification Form (EENF) for the 2017 Fermilab Site Demolitions. Based on the information provided in the EENF, the following categorical exclusion (CX) is approved:

<u>Project Name</u>	<u>Approved</u>	<u>CX</u>
2017 Fermilab Site Demolitions	2/14/2017	B1.16, B1.23

Enclosed is signed copy of the EENF for your records. No further NEPA review is required. This project falls under categorical exclusions provided in 10 *CFR* 1021, as amended in November 2011.

Sincerely,

Michael J. Weis  
Site Manager

Enclosure:  
As Stated

cc: N. Lockyer, w/o encl.  
J. Lykken, w/o encl.  
T. Meyer, w/o encl.  
B. Iverson, w/o encl.  
T. Dykhuis, w/encl.

**FERMILAB ENVIRONMENTAL EVALUATION NOTIFICATION FORM  
(EENF) for documenting compliance with the National Environmental Policy  
Act (NEPA), DOE NEPA Implementing Regulations, and the DOE NEPA  
Compliance Program of DOE Order 451.1B**

**Project/Activity Title:** 2017 Fermilab Site Demolitions  
**ES&H Tracking Number:** 01140

I hereby verify, via my signature, the accuracy of information in the area of my contribution for this document and that every effort would be made throughout this action to comply with the commitments made in this document and to pursue cost-effective pollution prevention opportunities. Pollution prevention (source reduction and other practices that eliminate or reduce the creation of pollutants) is recognized as a good business practice which would enhance site operations thereby enabling Fermilab to accomplish its mission, achieve environmental compliance, reduce risks to health and the environment, and prevent or minimize future Department of Energy (DOE) legacy wastes.

**Fermilab Action Owner:** Jonathan Hunt (X4312)

**Signature and Date**

 2/1/17

**I. Description of the Proposed Action and Need**

**Purpose and Need:**

The purpose of the proposed action/project is to remove idle/vacant trailers in order to avoid safety concerns and subsequent associated liability as well as the costs associated with continued maintenance and utility services.

**Proposed Action:**

This proposed action would include the removal of idle/ trailers (Industrial Area Trailers: T156 and T157 and MC8 Trailers: T045, T066, and T067) from the Fermilab site and recycling of associated materials, when possible. The asphalt pavement underneath would remain. There would be minimal ground disturbance and excavation, only enough to cut and cap a few utilities. The future Industrial Center Building expansion project would extend into the area where the Industrial Area trailers are currently located.

**Alternatives Considered:**

The 'no action' alternative would not meet the purpose and need. It would also allow non-functional and/or vacant structures to stand, wasting resources on maintenance and utility services. These structures are unsuitable for alternate uses due to their deteriorated condition.

**II. Description of the Affected Environment**

This proposed action would completely remove the above mentioned structures. The environmental effects are included in Section III.

**III. Potential Environmental Effects (If the answer to the questions below is "yes", provide comments for each checked item and where clarification is necessary.)**

A. Sensitive Resources: Would the proposed action result in changes and/or disturbances to any of the following resources?

- Threatened or endangered species
- Other protected species
- Wetland/Floodplains
- Archaeological or historical resources
- Non-attainment areas

B. Regulated Substances/Activities: Would the proposed action involve any of the following regulated substances or activities?

- Clearing or Excavation
- Demolition or decommissioning
- Asbestos removal
- PCBs
- Chemical use or storage
- Pesticides
- Air emissions
- Liquid effluents
- Underground storage tanks
- Hazardous or other regulated waste (including radioactive or mixed)
- Radioactive exposures or radioactive emissions
- Radioactivation of soil or groundwater

C. Other Relevant Disclosures: Would the proposed action involve any of the following actions/disclosures?

- Threatened violation of ES&H permit requirements
- Siting/construction/major modification of waste recovery or TSD facilities
- Disturbance of pre-existing contamination
- New or modified permits
- Public controversy
- Action/involvement of another federal agency
- Public utilities/services
- Depletion of a non-renewable resource

#### IV. Comments on checked items in section III.

##### Clearing and Excavation

Minimal excavation would take place for removing and capping utilities. No spoils removal is anticipated and soil erosion control measures would not be required for this activity.

##### Demolition or decommissioning

This proposed action would completely remove the designated trailers.

##### Asbestos removal

The structures would be inspected/tested for asbestos prior to demolition.

##### Hazardous or other regulated waste

The work would consist primarily of the demolition, removal, and recycling of various building materials. The Subcontractor would be required to dispose of all Construction and Demolition waste with a recycling vendor and obtain a report on the amounts of each material recycled for submittal to Fermilab. Prior to demolition, the structures would be inspected, and in some cases tested, for the presence of any regulated waste materials/items. Regulated waste would be segregated prior to removal by the Subcontractor. Recycling of metals would be coordinated with the Radiation Safety Group.

##### Public utilities/services

The demolitions would require shut-offs for local gas, power, communication, and domestic water services for removal and capping.

#### V. NEPA Recommendation

Fermilab staff has evaluated the proposed action and believe a Categorical Exclusion is appropriate. It is believed that the proposed action meets the description found in DOE's NEPA Implementation Procedures, 10 CFR 1021, Subpart D, Appendix B1.16, and B1.23 as follows.

**B1.16 Asbestos Removal**

Removal of asbestos-containing materials from buildings in accordance with applicable requirements (such as 40 CFR part 61, "National Emission Standards for Hazardous Air Pollutants"; 40 CFR part 763, "Asbestos"; 29 CFR part 1910, subpart I, "Personal Protective Equipment"; and 29 CFR part 1926, "Safety and Health Regulations for Construction"; and appropriate state and local requirements, including certification of removal contractors and technicians).

**B1.23 Demolition and Disposal of Buildings**

Demolition and subsequent disposal of buildings, equipment, and support structures (including, but not limited to, smoke stacks and parking lot surfaces), provided that there would be no potential for release of substances at a level, or in a form, that could pose a threat to public health or the environment.

**Fermilab NEPA Program Manager:** Teri L. Dykhuis

**Signature and Date** Teri L. Dykhuis 2/9/2017

**VI. DOE/Fermi Site Office (FSO) NEPA Review**

Based upon my review of information conveyed to me and in my possession concerning the proposed action, as NEPA Compliance Officer (as authorized under DOE Order 451.1A), I have determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is hereby categorically excluded from further NEPA review.

**FSO NEPA Compliance Officer:** Rick Hersemann

**Signature and Date** Rick Hersemann 2/14/2017

**VII. Appendix – Diagrams**

Location of Demolition sites are found in diagrams on the following pages.

# Industrial Area Trailers
