

**31st Annual Department of Energy
Virtual National Science Bowl®**

Middle School Virtual National Finals: May 8, 2021

High School Virtual National Finals: May 22, 2021

**108 High School and Middle School Teams from Across the U.S.
Compete Virtually in the NSB National Championships**

The U.S. Department of Energy (DOE) will host – virtually – 64 high school and 44 middle school teams as they compete for championship titles at the 31st annual National Science Bowl® (NSB). Since January, some 8,800 students have competed in regional tournaments in which teams competed in a fast-paced question-and-answer format, being tested on a range of science disciplines including biology, chemistry, Earth science, physics, energy, and math.

The National Science Bowl®, now celebrating its 31st year, is the nation's premier academic competition testing students' knowledge in all areas of mathematics and science, including energy.

On May 8, 44 middle school teams will face off in the National Finals to determine the top middle school and on May 22, 64 high school teams will face off in the National Finals to determine the top high school teams. All schools participating in the National Finals will receive between \$500 and \$2500 for their science, technology, engineering, or math departments, depending where they place in the tournament.

In addition to the Finals competition, DOE presents a virtual Cyber Challenge that has been made available to all middle school competitors in the lead up to the National Science Bowl. This event was hosted by Lawrence Livermore National Laboratory in April. Winners received funds for their schools' STEM-based activities and educational supplies to help students increase their problem-solving skills.

DOE created the National Science Bowl® in 1991 to encourage students to excel in mathematics and science and to pursue careers in these fields. More than 325,000 students have participated in the National Science Bowl® since its creation. Students may sign up to compete in next year's National Science Bowl® competition beginning in October.

The U.S. Department of Energy's Office of Science manages the National Science Bowl®, and sponsors the National Science Bowl® finals competition. Additional information about the teams and the National Science Bowl® is available at:
