

# Jane Elizabeth Herriman

**Graduate Institution:** California Institute of Technology

**Graduate Discipline:** Materials Science

**Hometown:** Plymouth, MI

**Relevant SC Research:** Basic Energy Sciences

## **Research Interest:**

I work in the group of Professor Brent Fultz, where my research is largely within the realm of computational materials physics. I use various techniques to calculate vibrational spectra and study the ways in which and the reasons for which vibrational spectra in crystalline materials diverge from a harmonic model. I am increasingly excited about high performance computing.
